PROFESSIONAL SUMMARY

Recent high school graduate and aspiring software engineer with a solid foundation from a one-year software engineering course. Eager to apply my skills in a dynamic and collaborative environment. Quick learner, detail-oriented, and dedicated to contributing effectively to a team's success.

PROJECTS

- **E-commerce website**

  An e-commerce website specializing in footwear. Played a key role in curating a diverse range of stylish and comfortable shoes. Leveraged a user-friendly interface to enhance the online shopping experience, facilitating seamless navigation and efficient product selection. It demonstrates proficiency in e-commerce operations. https://kaleidiana.github.io/E-commerce-website/

- **Transcription website**

  Implemented customizable features for a tailored transcription experience, demonstrating technical proficiency in software development. https://kaleidiana.github.io/TranscribePlus/coverpage.html

- **Food-post App**

  Food Post is a web application developed to tackle the pressing issue of food wastage in Africa.It is a centralized platform that efficiently connects those with excess food to individuals, farmers, and NGOs, enabling the efficient redistribution of surplus food and significantly reducing food wastage across Africa.

- **Login form**

  I created a simple Html and Css login form. https://kaleidiana.github.io/LoginClone/login.html
